

Learn Why So Many Seamless Gutter Contractors are Asking for

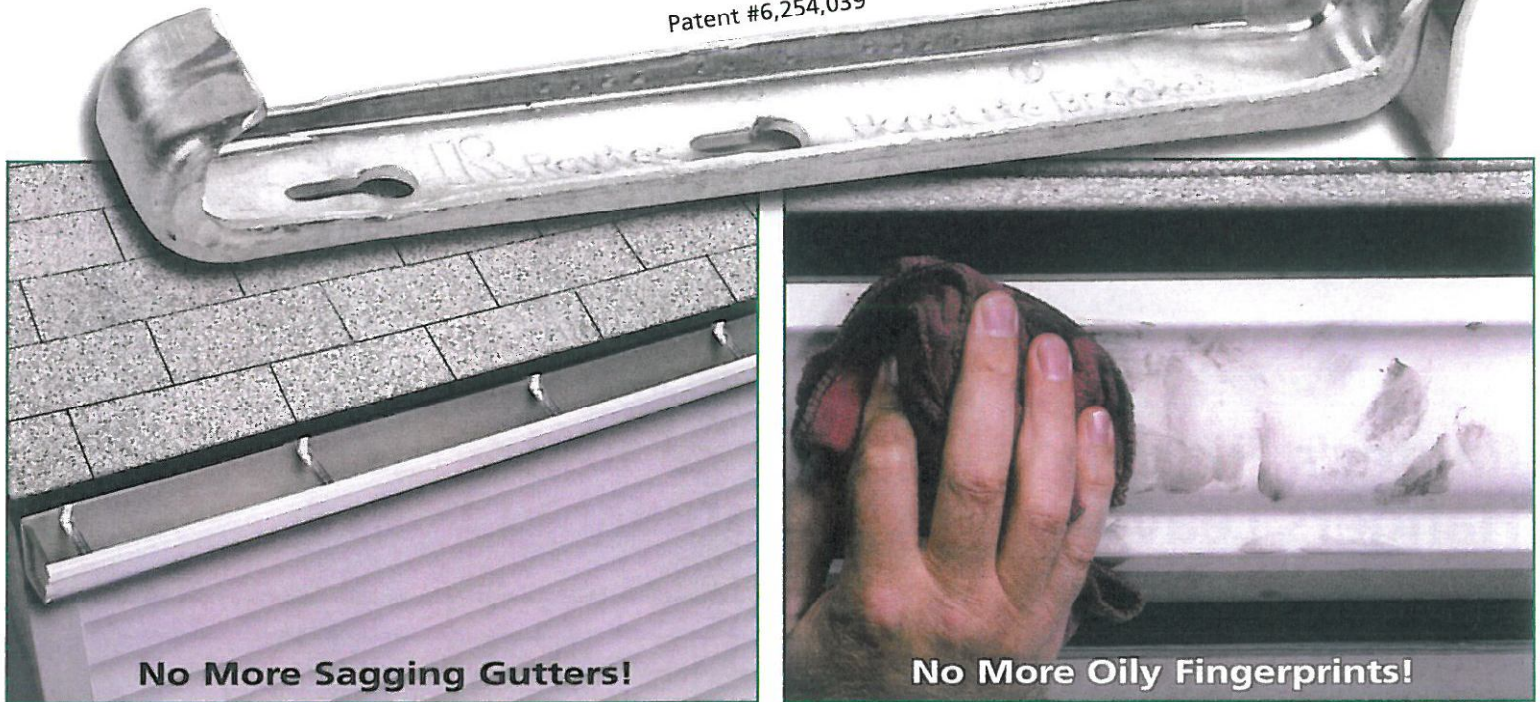

Hangtite™

Patent #6,254,039

Hidden Hanger With Super Strength!

Rain, Sleet, Snow, Ice, Wind — Hangtite™ Holds On!

Patent #6,254,039

No More Sagging Gutters!

No More Oily Fingerprints!

No More Customer Callbacks!
MORE Re-orders
No More Oily Mess!

Extensive testing of the most popular brands has resulted in the development of a new hidden hanger. Raytec's Engineers designed the Hangtite™ to be self-bracing at the points of stress. The channel-formed design makes it the strongest hanger of its type.

Proven in the Field!

Read what satisfied customers nationwide are saying:

- "Very strong...", MO
- "Looks like the strongest hanger in the business," PA
- "Very pleased with fit and strength," SC
- "We like them, they work great!" ND
- "Strongest hanger we've ever used," MN
- "More substantial than most," CO
- "More durable than the ones we **used** to use..." WI

Hangtite™

Patent #6,254,039

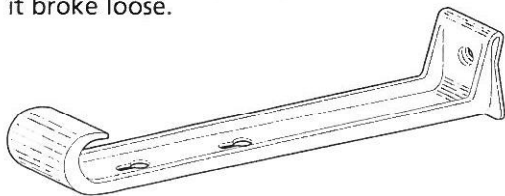

Hidden Hanger With Super Strength!

The Strongest Hidden Hanger in the Industry!

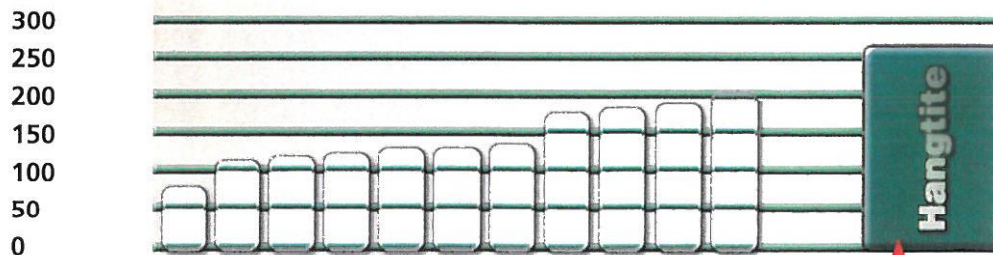

Raytec's Hidden Hangers Leave the Competition Sagging!

In the absence of standardized testing in the gutter industry, Raytec developed a pull test. Each hanger was evaluated for the amount of sag it displayed at various weights and finally the point to which it broke loose.

Our tests are only intended for comparing one hanger with another.

Number of Pull-Pounds Before Breaking Loose

The chart above shows results of the 5" Hangtite™ pull test. Hangtite™ is proven superior to all the others.

HangTite Holds on Tight to 260 Pull-Pounds!

Also Available in 6" With & Without Clip

BH 50.1 without clip

Now Available in Brass!

BH 51.1 with clip
