

PREMIER
GUTTER COVER

PREMIER GUTTER COVER

Premier Gutter Cover is a patented system that combines the best aspects of two conventional gutter leaf systems – a gutter cap and a screen – into one effective design to virtually eliminate gutter clogs.

How It Works:

This effective, self contained system utilizes the principle of water surface tension – the same principle that causes water to bead up on a surface or a stone to skip across a pond. The recessed gutter cap directs rainflow around the curve of the cap into the gutter. The width of the screen and the small hole size is optimized to allow water in and keep solids out. Small objects such as pine needles, small leaves, maple seed spinners and pieces of leaves are trapped by the fine screen.

Self Cleaning

The force of the rainwater on the louvered design rinses debris off the edge to the ground below,

Eliminate the
hassle and hazard
of gutter cleaning!

**Premier
Gutter Covers**
works on
ALL gutter styles
and ALL types
of roofs.

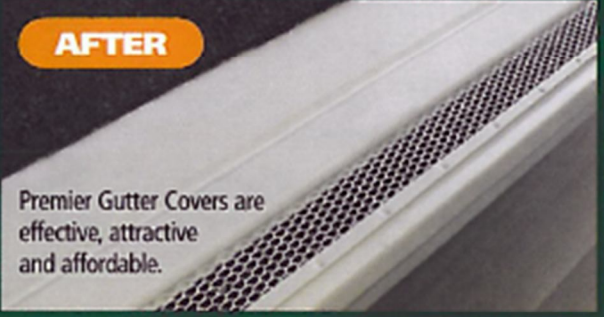

BEFORE

Gutters clogged with
leaves and debris.

Premier Gutter Cover virtually eliminates the hazards of overflowing gutters – from the hazards of climbing ladders to clean out debris, to the mess and damage from gutter overflow.

AFTER

Premier Gutter Covers are
effective, attractive
and affordable.

With **Premier Gutter Cover**,
homeowners may never
clean leaves or debris
from their gutters again!

making **Premier Gutter Cover** effectively self-cleaning. During periods of high rainfall, the recessed cap allows water to go into the gutter through the screen – not to the ground below.

Won't Damage Roof

Premier Gutter Cover slides under the shingles and fastens to the front of the gutter. This allows for expansion and contraction of the gutter without damaging the roof or shingles.

PREMIER GUTTER COVER

Benefits

• **HOW IT WORKS:** Water surface tension, the principle that causes water to bead up on a surface, causes rain water to be directed into the gutter by flowing around the edge of the cap. The nose of the cap is moved back from the gutter edge so water flows over the cap, through the screen, into the gutter.

• **HANDLES HEAVY DOWNPOURS:** Patented design allows even heavy rainfall to flow over the cap, through the screen into the gutter.

• **SCREEN KEEPS DEBRIS AND LEAVES OUT:** The only way to separate solids from liquids is through a screen. This fine screen allows water into the gutter while keeping small objects like pine needles, maple seed spinners and leaf pieces out.

• **SELF CLEANING:** The force of rain water rinses leaves and debris off the screen and over the edge to the ground.

• **GUTTER STYLES:** Installs on ALL gutters, new or pre-existing, any style.

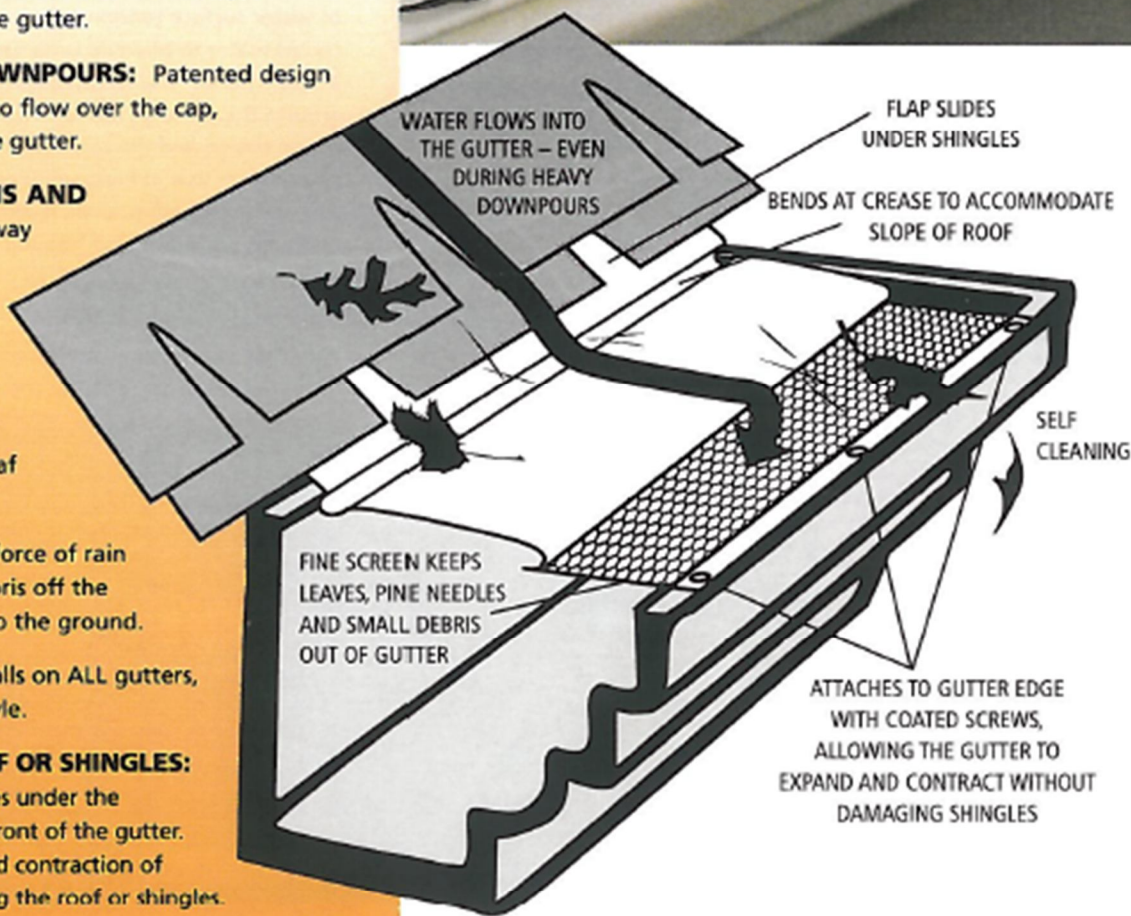

• **WON'T DAMAGE ROOF OR SHINGLES:** Premier Gutter Cover slides under the shingles and fastens to the front of the gutter. This allows for expansion and contraction of the gutter without damaging the roof or shingles.

• **ROOF STYLES:** Installs on ALL types of roofs including composition, slate, wood shake, tile and metal.

• **COLORS:** Available in white, royal brown, musket brown, terratone bronze, clay, black, and dark green.

• **CONSTRUCTION:** Rust-free aluminum.

• **FINISH:** Powder coated finish.
